

OUR COMPANY

Founded in the 90s in Santos/SP, our company has the **MISSION** to operate in the logistics chain with support in services regarding the preparation of cargo for transportation (sea, road or air), the execution of special packaging, cargo lashing and others, where we add safe and quality services to the actions of our contractors, whether they are Exporters, Importers, Agents, Shipowners, Transporters or Terminals.

According to the performance already established in our area and market, our **VISION** plans to continue with the same focus and determination, always, until we are recognized throughout Brazil, not only in the Port of Santos and Industrial Plants already served, but in a National way, being characterized as partners for all segments in the logistics chain, always focusing on Safety and Integrity of the Loads of our customers.

Our operating model, our **VALUES**, encompass specialized services, with qualified labor, personalized service and follow-up of all steps of the processes served, aiming at greater control of our customers and transparency in the cases where we operate.

Quality, Safety, Integrity, Sustainability, Honesty, Respect for the customer, are factors that we prioritize within our organization, **ALWAYS** behaving with respect to the planet on which we live, our greatest treasure.

SPECIAL SHRINK PACKAGING

"Shrink Packaging" is carried out according to the load pattern, and can be performed with films of different types, such as: transparent, pigmented white (with protection from UVA / UVB radiation) and VCI blue (with volatile corrosion inhibitor).

Your cargo will be safe in on-deck and exposed shipments, storage in external locations and weather conditions in general.

The service is carried out quickly and cleanly, without generating waste, in addition to using recyclable material, which does not harm the environment.

Talk to us and see the quality of our special lamination services, unique in Brazil!

LASHING, SECURING AND DUNNAGE

For "standard" volumes, shipped in containers of all types, Dry Van, Open Top and also non-standard, shipped in Flat Rack or platform containers, Export Co. offers lashing / unitization services, always aiming at security of your cargo.

We are also specialized in large cargoes shipped loose on ships, called Break Bulk, volumes that do not fit in containers and are shipped under deck or even on-deck of long course vessels.

We operate based on naval literature and international shipping conventions, which makes our service 100% safe and in accordance with the operational needs of Vessel's command, Immediate (Chief Officers) and Captains.

PALLETIZING

Export Co. offers cargo palletizing with treated pallets (export standard) and with several types of protection (angle bars, plastic films, pet and plastic straps, etc.).

With own manufacture, the pallets are made to measure, according to the dimensions of each load.

The service can be performed at the client location, at Port Terminals or in our operational warehouse, depending on the logistics to be used by our customers.

DAMAGE REPAIRS

We are accredited to carry out repairs on damaged packaging throughout the Port of Santos, being in Terminals, REDEX, Customs Zones, Primary Shipping Areas and even on board of ships.

With our own teams to work in each of these areas, we guarantee execution within the necessary deadlines, with planning, commitment and coordinated management, as a task of this level must be performed.

SPECIAL PACKAGING

(Crates/ Wooden Box/
Skidding)

Export Co. has the packaging solution for multimodal and protective transport for all types of cargo, from small to large, from 1 Kg to 300.000 Kg!

Performing services according to international standards, we prepare the packaging of your cargo safely, through procedures already tested and with know-how acquired with solid partnerships with US and European companies.

Consult us and send information about your product to design the most safe and suitable packaging!
